February 18, 2018

1 2018.1.20 - 2018.1.26

1.1 ZJ

Table 1: ZJ：2018.1.20 - 2018.1.26

工作内容	时间	备注
设计盈收曲线图	1.23	
Shape Ratio	1.25	
时间与索引对应	1.26	可以放到后面

1.2 Sean Go

Table 2: Sean Go：2018.1.20 - 2018.1.26

工作内容	时间	备注
检查交易点	1.22	
修改若干问题	1.24	见下面的问题清单
简单策略	1.26	有可能推迟

 We got those issues:

1. The best-P had a different P-shape with current-P (2099369)

2. Best-P go back and got a gap with current-P (2100798)

3. Price reached the max/min-lines then change the P-shape, often occurred at L0.

4. Check the gap of CP and iTop

5. How to deal with the current shot and previous shot?

6. Do I need remember the Highest or Lowest price?

7. The max/min-lines were unstable that will changed by new price, but the several previous shots was more suiteble for the new price.

8. Might, sometime, the channel was very broad than lower channel, so I can draw a previous level channel in current level.

9. If price changed violently might cause the price seesawed between max-min lines without p-shape-change.
